Abstract—This paper presents a new approach to the problem of detecting and localizing faults in a system of interconnected components. The approach is based on the use of a fault detection and isolation (FDI) algorithm that is designed to detect and isolate faults in a system of interconnected components. The FDI algorithm is designed to detect and isolate faults in a system of interconnected components. The FDI algorithm is designed to detect and isolate faults in a system of interconnected components. The FDI algorithm is designed to detect and isolate faults in a system of interconnected components.
